SUPERINTENDENT'S REPORT

To the School Board and Citizens of the Goshen-Lempster Cooperative School District No. 5, I herewith submit my third annual report as Superintendent of Schools.

Your decision to form a cooperative school district is, in my opinion, sound evidence that you are vitally interested in trying to offer a better educational program by providing those facilities which enable teachers and pupils to give full attention to the learning process.

It is difficult to concentrate on the work at hand when some one is constantly uncomfortable due to an excess or lack of heat, light and air conditioning. The necessity of adding fuel to the stove, moving closer or away (if possible in the space provided) detracts from the best teaching that can be offered.

Multiple grades limit the time available for each child in the variety of subject matter that we believe essential. Five and one-half to six hours a day divided into many parts is not sufficient to teach all that is required, or to provide those "extras" that children in other school systems are receiving. The boys and girls of Goshen and Lempster are as much entitled to the same educational program as any others in the state or nation.

The school board has worked very hard to try and present to the citizens a building program that is feasible and financially within the ability of the taxpayers. It has been a most cooperative group and has weighed the evidence in the light of citizens from each town. Your attendance at discussions of building plans and the budget, as well as your presence in exercising your voting privilege and duty, is further proof that you are also carefully balancing the evidence presented.

I hope that you will continue to assist us in making our decisions. We need your cooperation and your continued support to help your boys and girls now and in the future.

You are aware that the operation of a cooperative school district such as ours is relatively new in New Hampshire, and that we will need to make some changes as conditions warrant. I feel that, in general, the plan has worked out very well this year and if we could now combine our schools into one, that we would do even better.

I urge you to continue to operate as a cooperative district and make the decision to build a new school. I also urge you to support legislation which will provide an increase in state aid, this aid to be in the form of general aid, flat grant, building and transportation aid. It is necessary if the real estate burden is to be relieved and the support of schools is to be more equally distributed among our citizens.

The teachers, Miss Laughlin and Mr. Kathan of Goshen, have tried very hard to teach effectively in spite of crowded rooms and a severe handicap in terms of division of grades. Mrs. Starkey and Mrs. Newman, though teaching in less crowded rooms, have had to contend with wood fires, and divide their time among pupils in four grades.

Playgrounds are inadequate and far from ideal at any of the schools. Toilet facilities are a menace to good health.

Your school nurse, Miss Florence MacIver, and I spent many hours traveling to the four schools. We could be of more value if we could spend that time with teachers and pupils.

The pupils of Cornish and Unity have moved into new buildings this year and it is most gratifying to see the whole atmosphere and attitudes change for the good of all concerned. The building has provided a meeting place for many community groups as well as for school purposes.

I look forward to serving you in whatever capacity I can in the solution and improvement of your educational program. I sincerely appreciate the cooperation of the school board and the teachers.

Respectfully submitted,

RALPH H. MEACHAM,
Superintendent

SCHOOL NURSE'S REPORT

In 1833 a law was passed in France requiring school committees of towns and cities to keep school houses clean. From this very simple but necessary beginning stem our present day school health services.

What are school health services?

School health services are procedures established: (a) to appraise the health status of pupils; (b) to advise pupils, parents and others of the appraisal findings; (c) to encourage correction of remediable defects; (d) to assist in the identification and education of handicapped children; (e) to help prevent and control disease; (f) to provide necessary emergency service for injury or sudden illness.

Our modern school deals with the physical, mental, emotional and social development of each pupil. Gone is the day when the school was primarily concerned with the facts a child memorized. The desire now is health, happiness and foundation for a useful life.

Certain health services help parents and school personnel to become acquainted with the health problems of children, and provide a means of helping children obtain solutions for their problems. For example, vision and hearing tests assist in determining the degree to which a child may benefit from his school experiences. As child health is improved, other aspects of school endeavor are more successful. To learn effectively, children need good health.

Unquestionably one of the most important factors in carrying out our health program effectively is the very fine cooperation and understanding which you, as parents and interested individuals, have given it.

It is a great pleasure to work with you, and a very rewarding experience to work with your children. Thank you for your cooperation.

Respectfully submitted,

FLORENCE MACIVER, R.N.
